

In my Plane

1

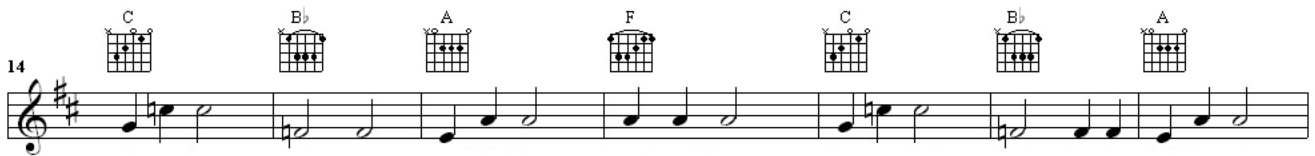

Chocks a-way! In my plane I loop and dive, And

7

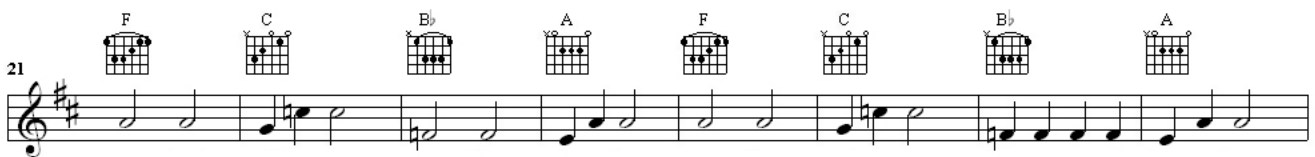

I make num-bers too. I'm going to count from one to five. Now see what I can do! Straight down

14

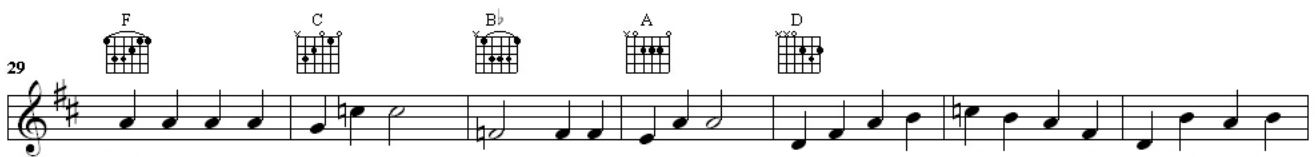

in a line, and then one looks fine. Around, and down, then straight, and two is look-ing great.

21

Two bends, fol-low me, now there is a three. Three lines make a four, down, a-cross and down you draw.

29

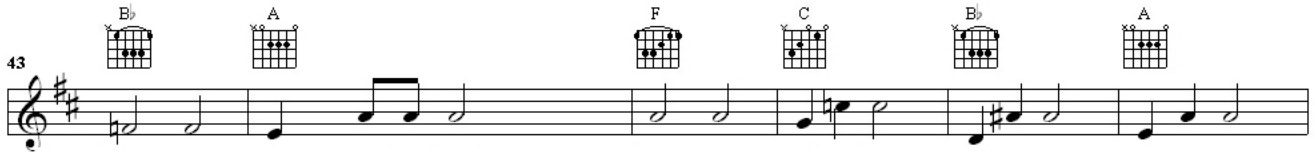

Down, a-round, but don't stop, five needs a line on top. In my plane I loop and dive, And I make num-bers

36

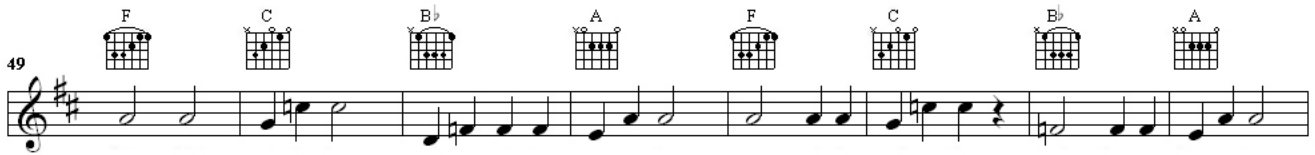

too. I'm going to count from six to ten. Now see what I can do! Dive down, come back round.

43

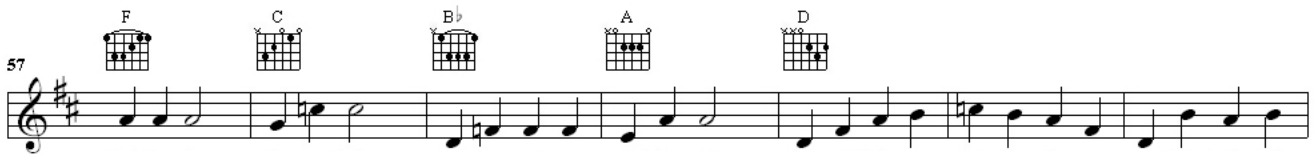

That's a six you have found. Seven starts straight a-long, then go down, you're not wrong.

49

Start eight at the top, make two cir-cles then you stop. One cir-cle and a line, and then we have a nine.

57

Make a one and _ then, add a cir-cle to make ten. In my plane I loop and dive, And I make num-bers

64

too. Now you can write them for your-self, Just see what you can do!
