

What is a family?

What is a family?

It means different things to different people

What is a family?

It means different things to you and me

You can have one mum

You can have one dad

You can have two mums

You can have two dads

I've got Nanu – my little sister

I've got Ali – my big brother

Then there's our cousins, aunties and uncles

And your robot too!

What is a family?

It means different things to different people

What is a family?

It means different things to you and me

You can have a step-mum

You can have a step-dad

Be raised by your grandma

Or by your grandad

What is a family?

It means different things to different people

What is a family?

It means different things to you and me

I've got Nanu – my little sister

I've got Ali – my big brother

Then there's our mother and we both love her

We take care of one another

Song

What is a family?

It means different things to different people

What is a family?

It means different things to you and me
