

The zoo powered by poo - ANSWERS

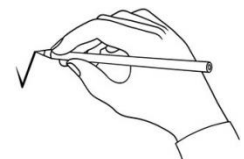

1. Match them up!

Match the words with the definitions.

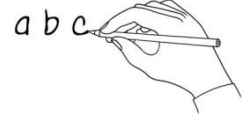

2. Listen and tick!

Watch the video. Tick the three things they talk about.

- | | |
|-------------------------------------|--|
| <input type="checkbox"/> | All the different animals that live at the zoo |
| <input checked="" type="checkbox"/> | How the animal poo is collected |
| <input checked="" type="checkbox"/> | How the animal poo is made into energy |
| <input type="checkbox"/> | The reasons why some animals need to live in a warm building |
| <input type="checkbox"/> | How much it costs to make energy from animal poo |
| <input checked="" type="checkbox"/> | The problem with using oil to heat the zoo's buildings |

3. Fill it in!

Watch the video. Complete the sentences.

dried	warms up	burnt	stop	use	shredded	sweep up	collected
-------	----------	-------	------	-----	----------	----------	-----------

- The keepers sweep up the poo every day.
- The poo is collected by the animal-waste truck.
- The waste is shredded into small pieces.
- The waste is dried to take away the moisture.
- The poo and straw lumps are burnt to make heat.
- The heat warms up the tropical house at the zoo.
- The zoo wants to stop using fossil fuels like oil.
- The zoo wants to use poo instead of oil to heat more places.

4. Write and draw!

Children write about whether they have been to a zoo and draw a picture.
